## II. Comprehension (6M)

Read the following passage then answer the questions below:

**N**ormally, people sleep between seven and eight hours a day. But millions of people have trouble getting to sleep every night. Most people know that tea and coffee make it difficult to sleep because they contain caffeine. But some medicines such as cold pills and sleeping pills may help you sleep but when you wake up the next morning you feel tired.

Busy people who work a lot during the day may not be able to fall asleep at night. Eating just before going to bed may keep you awake.

You shouldn't use your bedroom as a TV room, or an exercise room. You should go to bed when you feel tired. Try to go to bed at the same time every night and get up at the same time every morning.
