### **B:** Reading Comprehension (16Marks)

### Read the following text carefully then answer the question below:

Sushi originates in a Southeast Asian dish, known today as "salted fish". It is stored in rice for possibly months at a time. It is a very well- known dish all over the world. fermentation of the rice **prevented** the fish from spoiling; the rice would be discarded before consumption of the fish. This early type of sushi became an important source of protein for its Japanese consumers. The term *sushi* comes from an old grammatical form no longer used in other contexts, and literally means "sour-tasting"; the overall dish has a sour taste.

Vinegar began to be added to the preparation of sushi for the sake of enhancing both taste and preservation. In addition to increasing the sourness of the rice, the vinegar significantly increased the dish's long preservation, causing the fermentation process to be shortened and eventually abandoned. The early types of sushi were developed in Osaka, the seafood and rice were pressed into a shape with wooden (typically bamboo) shape.

The common ingredient in all types of sushi is vinegar sushi rice. Fillings, toppings, and preparation vary. Sauce can be added and it's called wasabi. It's added as a topping. This dish is now one the most famous meals and it is served all over the world.
