Model A

Paper2

Paper Two (150 Marks)

I. Composition (50 Marks)

Attempt only (ONE) of the following topics, either (A OR B):

A) Report

"Islam urges us to help each other and to do good deeds."

In a report of (12 sentences), write about the last time you did something nice for someone without them asking you. Mention what it was that you did, why and when you did it. How the other person reacted, and how you felt about your good deed.

The following guide words and phrases may help you:

obey – follow – teachings of Islam – prophet – good citizen – charity – cooperation – support – needy – weak – helpless – society – grateful – satisfied – trust – set an example – pleased – be able to – give a hand – blessings – thankful – encourage others – do the same

OR:

B) Dialogue:

(Ali/Alia) is a new student in your class. He/She wants to know more about the school. In (10 exchanges), write the dialogue that might take place between you (Nabil/Noha) and (him/her) about the school rules, facilities, timetable and teachers.

The following guide words and phrases may help you:

uniform – coming early – strange haircuts – mobile phones – not allowed – running – corridors – clean and tidy – writing on walls – keeping – science – language – labs – library – cafeteria – theatre – playgrounds – break time – periods – kind – helping – caring – teachers

II. Reading comprehension (50 Marks)

* Read the following passage carefully, then answer the questions below:

Achoo! We all sneeze sometimes. Sneezing is a reaction that your body does automatically. That means you cannot make yourself sneeze or stop one once it has started. When you sneeze, your body is trying to get rid of bad things in your nose, such as bacteria. You have extra germs when you have a cold, so you sneeze a lot more. You might also sneeze when you smell pepper!

Inside your nose, there are hundreds of tiny hairs. These hairs **filter** the air you breathe. Sometimes dust and pollen find **their** way through these hairs and bother your nasal passages. The nerves in the lining of your nose tell your brain that something is invading your body.

Your brain, lungs, nose, mouth, and the muscles of your upper body work together to blow away the invaders with a sneeze. When you sneeze, germs from your nose get blown into the air. Using a tissue or “sneezing into your sleeve” captures most of these germs. It is very important to wash your hands after you sneeze into **them**, especially during cold and flu season.

Do you ever sneeze when you walk into bright sunlight? Some people say that happens to them often. Scientists believe the UV (ultraviolet) rays of the sun irritate the nose lining of these people so they sneeze. If someone nearby sneezes, remember to tell them “Gesundheit!” That is a funny-looking word which is pronounced “gezz-oont-hite.” It is the German word that wishes someone good health after sneezing.

A) From a, b and c choose the correct answer: (4x4=16 Marks)

1. The underlined word "**filter**" means:

a. stop

b. clean

c. decrease

d. smell

2. The underlined word "**their**" in line 7 , refers to:

a. dust and pollen

b. hundreds of tiny hairs

c. germs and bacteria

d. nasal passages

3. The main idea of the 2nd paragraph is :

D) With reference to the passage, complete the following sentences: (3x4=12 Marks)

12. After sneezing during cold and flu season, it is important to.....
13. The function of the tiny hairs inside the nose is.....
14. Sneezing helps the body to.....

III. Summary Making (20 Marks)

Read the following passage carefully, then answer the question below:

There is only one natural satellite — the Moon. But there are many man-made or artificial satellites revolving around the Earth. Artificial satellites are of many kinds. Of them, weather satellites send information and pictures of clouds, storms and ocean currents. They are used to predict the weather. This information is also used to warn people about storms, floods, forest fires, etc. Communication satellites are used to transmit telephone conversation and TV programmes across the Earth. They are helpful in sending messages through fax machines, using mobile phones and the internet. Science satellites send information about outer space. Astronomers study this data and get to know more about things in space. These satellites are launched into space by rockets. Once beyond the Earth's gravity and atmosphere, they are sent circling around the Earth by the force of another rocket. There is nothing in space to obstruct the path or speed of these satellites. So they continue to keep going around the Earth, just like the Moon.
